Here's what was said about the 2009 Summit

- I couldn't find this much information in one place anywhere else. And the cost – wow!
- I had a great time and received high quality education, without the long drive to the big city.
- As a new Director of an EMS organization, there was a broad overview on a variety of topics-that is what attracted me to this conference over others that are offered. From billing, to law, to HR issues, to professionalism, to safety-it was all there for me. Thank you!!
- Dueling pianos – WOW!!
